

Bretnor. 1616.

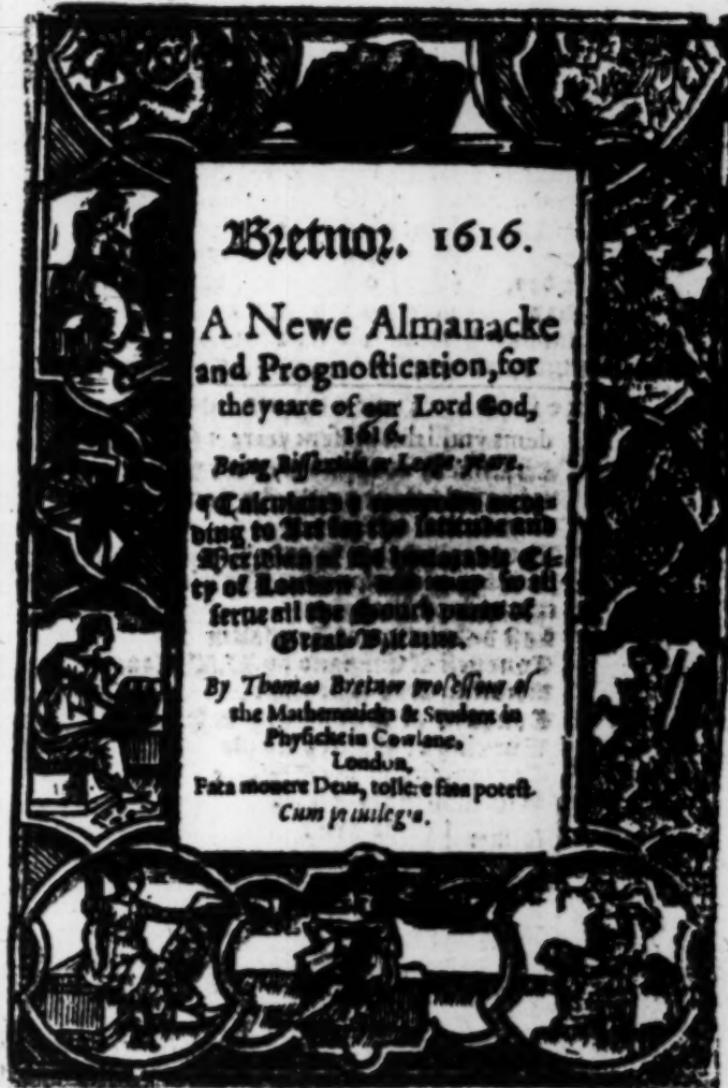

A Newe Almanacke
and Prognostication, for
the yeare of our Lord God,

1616.

Being Differentlye Ioyntlye Writ.

¶ Calculated by the best Mathematicke
Artificer in the Cittie of London,
and shal be sold
Unto all the deuout peple of
Great Britaine.

By Thomas Bretnor professor of
the Mathematicke & Souldier in
Physicke in Cowiane,
London.
Para monere Deum, tollere fias potest.
Cum priuilegio.

A Note of the more notable
Feasts vied in England.

The new Account vied bes-
yond the Seas.

	0. 0

The vſe and application.

The day of the month noted wherin the time of full sea at any of these places is required, do but obſerve the 6. column of the Viminacke, and right ouer againſt the ſame day you shall finde the time of high water at London-bridge, to o2 from thence there noted, adde o2 subtract ſuch houres and minutis as this table doth appoint, & the totall of the one, o2 remainder of thatheſt is the thing you deſire, ſo that further demonstration is needless.

These Arts following are taught by the author in
English, Latine, French, & Spanish.

Arithmetickē	{ Whole Numbers and Fractions. Extraction of Roots, Cubick, Square, &c. Rules of Equation with Colle or Algebra.
Geometry.	{ Principles therof with practise & demonstration. Surveying of lands &c, with many vsefull instruments Measuring of timber, stone &c, or any solid cōtent Reducing of Plots or Maps to any desired proportion. Dialling in general The manifold vse of the tables of Sines tangents, &c
Naviga-	{ Principles therof with vse of any Nauical instrument, Directions to find out the Longitude and Latitude, as well by instrumentall obseruations, as Planeticall Coniunctions.
Astro-	{ The calculation of the true place & motions of the planets in the vse of the Spheare, and both the Globes. (nets.)
Astro-	{ The effectes of the Planets in each seuerall signe and mansion.
logy.	{ Their revolution, profession, transiſion, & direction fr̄ any dñe point of the heavens, to another assigned.

Note (courteous Reader) that the Instrument which M. Hopton
termed his *Clype Mathematica*, is hitherto concealed in regard a-
nother of the like projection, but more vsetfull & easie, is invented
& communicated by my learned friend M. Edm. Gunter of Oxford
& is made in brasse by M. Elias Allen ouer against S. Clements
Churche. There is another Instrument also invented by M Tho.
Clay of Rigate, which hee very fitly nameth his *Gradeticall gem*, in
respect of the manifold vse therof, as wel in matters of Surveying
as in other Arithmeticall & Geometricall conclusions, & this
is made in wood by M. John Tompson in Hosier Lane, if any
desire to know the general vse of them or any others, such may at
conuenient times repaire to my house, where I shall be willing
to yeeld them the best satisfaction I can.

Bath oft bleed not vnfesse occasion vrge,
 nor do thy body too vntimely purge:
 More health is gotten by obseruing diet,
 then pleasure tane by vaine excesse & ryot

To purge, to bath or bleed, is not debar'd,
 so that the Golden meane be wel obseru'd:
 It's also good to hunt, to ride and run,
 so that extremes heerein thou ever shun.

Now hunt the Hare, the fearefull Buck pursue
 bid idlenesse and Venus sports adieu
 The careful Husband that intends to thrive,
 will like the Bee bring honie to the huie.

11

Strike not a vein, nor do no phisicke take
 valesse thou wilt a breach in nature make :
 Nor meddle not with wine nor wanton toyes
 least thou deprive thy selfe of hoped ioyes.

Cheare vp thy selfe, and do such phisicke sake,
 as may thy body sound and healthfull make.
 Take heed of surfer, naughty fruits forbear,
 if thou intends to liue another yeare.

Yet Phyfickes helpe is not to be refused
 of such as want and warily can vse it:
 Good sport abroad for such as keepen hounds,
 but best at home for him þ hath no grounds

Hot meat, sweet wine, & fire of fragant wood,
the spirits raise, and help to chear the blood
But milk and keal, & all such waterish gear
bequeath to him that hath no better cheare

Certaine instructions for the better vnderstanding
of some notes and characters placed in this Alma-
nack and Prognostication

TLet passe the 1, 2, 3, 4 and 5 columnes of each left page in the Almanack, wherein the dayes of the moneth, dominical Letters, Halyngaynes, & signe wherein the ☽ is, and the tyme of full-Moon at London-bridge are inserred, it is not amisse to shew the signification of some notes and characters placed in the 5 columnes of the same. First therefore obserue that the 12 signes are usually thus figured. ♀ Aries, ♂ Taurus, ☎ Gemini, ☲ Cancer, ☳ Leo, ☷ Virgo, ☵ Libra, ☶ Scorpio, ☸ Sagittarius, ☹ Capricornus, ☴ Aquarius, ☳ Pisces. The 7 Planets in this manner ☰ Sunne, ☷ Jupiter, ☵ Mars, ☶ Sol, ☷ Venus, ☴ Mercurie, ☹ Luna the Moone.

The common aspects thus.

* Sextile, ☵ Quartile, ☶ Trine, ☷ Opposition, ☶ Conjunction
The Dragons-head, on this fashion ☷, the Dragons-tail the same
timesed thus ☵.

Their naturall qualites and behouefull uses are best learned in English from Claudio Darioe his booke of the iudgement of Starres, And in Latine from Origan his introduction to the Ephemerides, wherunto I referre you whil'st better are a breeding.

I haue onely in the said 5 columnes put downe the ordinary aspectes of the ☽ with the other planets, and their sun to another, the knowledg and obseruation whereof questionless aualideth not a littel as well in physciall as ruall practises. For if the ☽ be the earths planet (as doubtlesse she is) than doe we by her share and influence to and from the other planets and starres, receive their influence both good or evill or whatsoever, which howlesence it may seeme strange that she shold so sodainly transport or conney the same hether considering that wonderfull distance hence, yet if we truly weigh the nature of heate and light, and how powerfull and fuisse their fluy and emanations are, besides common experiance in ordinary accidents, it will appaere no wonder at all. Although graunted (as of necessarie it must), it is not impertinent to give some directions appoyntlyng in medicinall practises: and first,

For Phlebotomia.

In regard blood is the chiefeſt humour in mens belly, amoung which the metall spirits are alwayes resident, for where the one in ſome the other ſpendeth, thererid it is very dangerous at any time without urgent occation and good aduise, to mak any quantite thereof, and ſpecially if a very good diet be not afterwardes well obſerved, for how can good blood be renued as gotten by intermitting ſtrecting of bad blouds. And where the bloud is nought and

A Prognostication

most differrency, there is greatest danger of all in effluvium referred to the opinion of some halfe Chirurgions and idle busie people, who thinke that if the blood be evill, a larger quantity may be most safely exhanised, whereas indeede such blood shold rather be purg'd by ministrick, diaphoretick, and distillall meanes, then by any such pernicious and inmoderate clystall. And because theris a fit tyme for all things (as the dexter Country man by ancient tradition, in bleeding his cattis, and lidding and gelding of them with oblongh, howesover some bold-haraydly-hoole-latches (yowring against naturall reason and true Physiologie) seame any such (out of whose bloddie fingers I wch all honest men flee :) my counsell is, that blodd bee taken with good discretion, and conuentione meaneze.

Of the Eclipses happening this yeare 1616.

Tempe this yeare will most of the Helenian inhabitants, and those also will some part of our earthy Divinitie, bee deprived of all, or most part of the Sun his sole-bearinge light; which howsoever it may seeme strange and increadible to my friends \oplus . Dancy, and others of his ranke and stile, who with \oplus . Thomas will believe nothing but what they see and feel, yet shall such who either travel or travell, into the Calorne, or Gallerne, parts of this our mortal Starry Skye to be most certaine and true.

The first Eclipse shall appear by on the Moones body, the 2^d of February, but so humures after our noone-tide, at which instant the Persians, Tartarians, Chinois, and Mauchern Mexicanas, shall behold the hols body of the Moone, for a small time, totally depriv'd of Sun shins, the Moone being then situated under the 13 degrees and 28 minutes of Virgo were unto the Dragons tail, which threatens no small hurtment to cheif Lawyers, Officers, and Counsellours, and the easterne because Mercury at the same time is combust and opposite to his royall dignities: But because it doth not much conserue the Climate wherin we live, I passe to speak any more thereof.

The second will be of the earth at Geneva (whiche you inherben) and that will fall out the seventh of March, eleven minutes after 6 o clock in the evening, when the Sun at his very setting as departing from one Horizon, will encounter those quarters of the Moong her shadow, and so consequently shall the earth, for a small season, be depriv'd of the like quantity of Sun shins. This Phynomenon as appearance, shall the Newfound-landers, Bermudas, Virginians, and Gallerne Americans, truly behold, in their sovreignes souther or latit, as they are nearer, or further distant from the basis of our inheritance, which happening in the latter part of Pisces, and termes of A. forsooth no small disturbance, and vnuers, amongst them, by hidion, crudity, and inhumane deaignes of mortall enemies.

A Prognostication

The fourth (visible in our hemisphire) will be of the Moon, and that will come to passe upon the 17 day of August at 1 a clock, and 4 minutes in the morning, at which instant she will be totally eclipsed by the interposition of the Southerne moiety of the earths body, threescore and the thre. The moon will happen to transverse the sunnes grounds 48 minutes after midnight, and continue therin more or less until 4 minutes after 4 in the morning, at which instant she will fully recover perfect Day-light and Sun-shine, so that the continuallance of this eclipse will be 3 hours 16 minutes: the effects hereof (beginning after Proloomes opinion about the 15 of July next year, and ending the 23 of August following) will be shewne, for the most part, amongst Clergy men and Governours of the Church: For Proclus saith that Eclipse Lune in 3 denario primo Sacerdibus & officibus ecclesiasticis & mortuorum offeri: And because it happeneth in the eight heavenly Mansion, it may very well signifie the death of some great Prelate in some City or Countrey subject to the Signes places, and such are, Alexandria, Smill, Compostella, Rean, Radibone, Sic. and of Compartos, Cilicia, Calabria, Portugallia, Sic.

The fourth and last eclipse will be of the Sunne, or rather of the earth, the last of August at night, which will not be stene of vs at all, but onely will appear to such people & travellours, as are dwelling or passing neare the Straights of Magellana, and the East Indian Islands: and because this Eclipse will be great, it may very well portend both famine plague and sedition amongst them.

If God do ockers plague and smite on vs:

Where be our thankes! where's our obediency!

Shall we conciuine still in error thus,

And sinning tempt the Highests Patience?

No: if we do, we may be well assured,

His wrath at last can never be endured.

It's true indeed more strange Eclipses chance

To our Antipodes then to vs appears:

Whence they are subiect to some worse mischances

Then t'vs portended by the starry Spheares,

But what of that? We know th'Almighty's power

's nide to no meanes, but can affick each houre.

Of the fourre quarters of the yeare, and first of Wintor.

WINTER is vsually sayd to beginne at such time as the earth by its continuall circumrotation hath gotten its selfe to its greatest Southerne inclination, for then this part of our Hemisphire is furthest deflected from the Sun his all-heating rays: or wher the Sunne (according to apparence) by his like motion hath attayned the furthest limit of his Southerne declination, which either way considered came to passe last yere, vpon the 23 of Decem-

19

BREVIARY 1610.

for at 3 a clock and 8 minutes after midnight, there will be a Luna, the quarter as it is naturally cold and moist, so is it like to the sun, but besides many blustering storms of wind and frost, from swooping frosts will extremes infect us. Neither will sicknesses be strange, for besides the usual humours of Gout, Colic, and Piles, Dysenteries, &c. will many more indeed appear, to the damage of the Body, and grieve of the Patient, &c. Many robberies and much piracy will be committed this quarter, by land and water both persons, which the Gallions greatest say.

Of the Spring.

It will happen the 10 of March at 3 a clock and 37 minutes in the morning, that the plane of this Circle whereon the Sun doth make his diurnal circumvolution directly, as face to face, to the Equinoctial, and so consequently obsecing every position thereof in equal times, to equal quantity of light and darkness, shall make day and night alike long all this world over, at which instant our Sun shall touch the nearest limit of the religious Equinoctial Line v. shall begin the second Astronomical Quarter, which is called the Spring, which whether way taken the hours shall bee in this manner disposed.

A Prognostication

THESE high position and configuration, conjoined with the conjunction preuentional, and opposition postuentional, yield no great argument of any notable inconuenient this revolution, save only rumours of warres and distancene among the ignoble sort, great losse among creatures by their desperate and vaine-glorious desirous, and a disposition to epidemical distastes in your selfe.

Of Summer.

THE EARTH after 93 revolutions including Goutherby this yr Southerne motion to the Sunnes presence 23 degrees, 32 minutes, hath 30 seconds, will, according to its greatest inclination value his remoue vs in the greatest arch of Sunnes shew and least scandent of syndotes or the Sun (after old synhill.) inclining thereto to a like appearance in all respects, will make longest dayes and shortest nightes to vs, which effects (either waye considered) will happen the 11 of June by 6 h clock had 42 minutes in the morning, the 3 of Aug. alterwering.

The distastes will be such, as vinally haue this quicke, if some of them be not more vehement, and for weatherage, and other occurrents I referre you to the monthly disposition following.

Of Autumne.

THE 12 of September a quarter of an hour past 9 h clock, the Earth axis parallel to the Sunnes, shall beginne cause it to move in his highest revolution directly to the Sunnes aspected; as the Sunne (after common course) passing the worlds axis with vrste angle shall make equal counte in every Horizon through both hemispheres, and so consequently either waye make the axis right althe long daye therer, at which period (the earth having attained the first temple of Aries, at the Sunn the like point of vs) the fourth and last quarter of the year (commonly called Autumn) shall take his beginning.

By the configuration of this our Sol he do the rest and the quality of the season this year, I gather that the winter will be cold and weatherage uncomfor. and suches chearely rased from corruption of bloud, as pimiles, small poches, meplies, hauing smetes, of strange nature and deuouchfull cure.

A more particular Prediction of the Aires
 Daily disposition, the places of the Planets,
 and their Sympathicall affects.

Iunaniq.

TDeficit day blustering weather.

Last quarter the 3 Day 26 minutes past 2 in the morning, and the 3, 4, and 5 days disposed to snow, the 6 and 7 blabby days. Full Moon the eight day, half an hour past nine at night, and the 9, 10, 11, and 12 days. Cloudy and cloudy, the 13 and 14 frosty days.

First quarter the 15 Day 23 minutes past 4 in the afternoon, and the 16, and 17 kindly days, 18, 19, 20, 21, and 22, more wet than blabby.

Full Moon the 23 Day, a quarter past 4 at night, and the 24, 25, 26 and 27, scatricke days, the 28, 29, and 30, disposed to snow.

Last quarter the last day, 6 minutes past 4 in the evening, blutting weather.

Good days

- 1, 4, 7 patient well profresh,
- 3, 6, 9 After a long pausit,
- 10, 11, 12 By plaine plating,
- 14, 16 Catch that catch can,
- 17, 19 Way and certeine,
- 24, 28, 30, Killcowne at a wesp,
- 26, 27, 29, Duran Duran,

Wet days

- 2, 5, All comet, all leede,
- 7, 8, I would by the court,
- 13, 15, short month a black moon,
- 16, 19, Wet from morning,
- 21, 22, 23, Gentle curving,
- 25, 26, 27, Wet a day or two.

A Prognostication

February.

12, 13 and 14 dates something vacable, the 15, 16 and 17 some thun-
der and hale.

Full moon the 19 day 6 minutes before 7 in the evening, and the
19, 20 and 21 seasonable dates, the 22, 23 and 24, a halfe stopinge
winn and then.

Last quarter the 28 day 5 minutes past 4h in the fore-moone, ayf
the 26, 27 and 28 parching hot dates, the 29, 30, and 31 a little more
complaynt.

Good

A Prognostication

Good days.

2 Make hay while Sun shineth	3, 4 Be better advised.
2, 5 No perfect requital.	6, 9 Thy cap agst.
7, 10 It cometh well.	12, 15 The Gallows groaneth.
8, 11 Go great comfort.	13 Thou will rep. n't it.
14 Slack not thy tide.	18 At open defiance.
16, 17 Be constant and fears not.	20, 21 A false alarm.
19, 21 It may do well.	23 In hope of good hap.
23, 24 All for thy good.	26, 28 An Eel by the tail.
26, 27 Let the spise work.	30, 31 Hopless expectation.

Cuill dates.

6, 9 Thy cap agst.

12, 15 The Gallows groaneth.

13 Thou will rep. n't it.

18 At open defiance.

20, 21 A false alarm.

23 In hope of good hap.

26, 28 An Eel by the tail.

30, 31 Hopless expectation.

August.

A Prognostication

When 1, 2 and 3 cold and willing, the 4, 5, 6 and 7 more temperate.
First quarter the 8 day 9 minutes past 4 in the morning, and the
9, 10 and 11 scalding bales, the 12 and 13 more of raving.

Full Moone the 14 day 24 minutes past 9 at night, and the 15
16 and 17 unconstant weather, the 18, 19 and 20 cold and tempest.

Last quarter the 21 day, 16 minutes past 8 in the morning, and
the 23, 24 and 25 some stormy gusts, the 26, 27, 28, and 29 some
amends.

New Moone the 30 day first at 10 in the morning, and the 31
variable bales.

Good bales.

- 4, 5 A friend in a country.
- 6 Mildly handled.
- 10 Thine own by law.
- 11, 13 An honest chil.
- 14 Speake betime.
- 18 Hold verity.
- 19, 20 Highly esteemed.
- 21, 23 Kindly embrach.
- 24, 25 Fast bind fast bind.
- 26, 28 As thou wouldest have it.

Evill bales.

- 1, 2 Take heed of a fall.
- 3 Toyle to no purpose.
- 7, 8 What's in the bewing;
- 9 A rope and a halter.
- 12, 15 Beyond thy reach.
- 16, 17 Each way to wand.
- 22 He will turne Turk.
- 27, 31 Ad graces Calendas.
- 28, 29 A whitchee incubell.

Nouember.

26	14	51	15	48	4	20	2	28	2	44	2	7	71	0	5	28

The first, second, and third kindly weather, the 4 and 5 windy
and wavering.

First quarter the 6 day 17 minutes after noone, and the 7, 8, and
9 some dashing showers, the 10, 11 and 12 more temperate.

Full Moone the 13 day, 3 quarters past 9 in the morning, and
the 14 and 15 rustling winds, the rest of the quarter not much dis-
senting.

Last quarter the 16 day at 6 a clock in the morning, and the 17, 18
and 24 stormy now and then, the 19, 20 and 27 more mild and
temperate.

New Moone the 28 day, 6 minutes past midnight, and the 29 and
30 some calme intermixt.

Good

Bretmor 1616.

24

Good daves.

- 3, 5 Long before thank.
- 3, 10 December.
- 3, 7 Take counsel byon it.
- 3, 9, 10 Ready temper.
- 18, 19 Make account of it.
- 22, 23 Be ruled by reason.
- 25 Well adventure.
- 30 Thou shalles thy counsing.

Evill daves.

- 4, 6 A chain on the blind fives.
- 11, 12 A helpless beggar.
- 13 At daggers drawing.
- 14, 15 From the trench outward.
- 16, 17 Thy suite is cold.
- 20, 21 Bread and a serpent.
- 24, 26 More hast worse luck.
- 27, 28 Backward, and backward.
- 29 Thou shall go whilie.

December.

The first, second, third and fourth, chilly cold weather.

First quarter the 5 day 23 minutes past 8 at night, and the 6, 7 and 8 kindly for the time, the 9, 10 and 11 no great alteration.

Full Moone the 18 day 40 minutes past midnighe, and the 1, 2, 14 and 15 seasonable dates, the 1, 6, 17, 18, 19 and 20 more blustering.

Last quarter the 21 day, 3 quarters past 3 in the morning, and the 22, 23 and 24 disposed to know, the 25, 26 and 27 not much dissenting.

New Moone the 28 day, 43 minutes past noon, and the 29, 30 and 31 variable dates.

Good daves.

- 3, 6 As sure as check.
- 4, 6 Be not too confident.
- 7 It will come at last.
- 13, 14 Thorough the bryers.
- 16, 21 By some peccy place.
- 18 Lay halfe in time.
- 20, 23 First come, first served.
- 25, 26 It makes up thy mouth.
- 27, 31 A crafty fox.
- 30 Spare to speak, spare to speed.

Evill daves.

- 1, 3 A croyn to pull.
- 5, 8 In a deep melancholy.
- 10, 11 Beyond his element.
- 12 Quite off the hookes.
- 15 He pleades pouerty.
- 17, 19 In dock cut nettle.
- 22 In a heavy case.
- 24 It is all in vain.
- 28, 29 Clest and countefit.

19

A Prognostication

In A Stromastiges.

Let *Piscis* prate, and let *Pisces* pine,
Let *Douay* dote, and let *Egypt* frowne,
Let *Chambers* chafe against the cleare sun-shine;
And let *Couney* all his senses drowne:
Let echi malitious brat that ere was bred
Disgorge his spleyne and rip his idle head.

'Tis out of malice or mere ignorance,
These Sophisters gainst nature so combine:
For had they knowledge, or some little glaunce
Of her effects, her force, and powers diuine,
Vermillion blisshes would their faces die,
Or else, perforce, they must say tongue lie.

To prove these Bizardas skill, let any man
At full, or change, or any dire aspect
Of chilly *S. mons* or aduring *Mars*,
Or *V. son*, or *plant*, or other thing effect,
And he shall find for alhit taken paine,
That cost and laboure is but spent in vaine.

Did not the great *commander* of this *Vnive: se* *Sold: hor: min:.*
In one sole day thei heavenly Spheres creat: gen: ha:
And did he not ordaine by their commerce,
That like his like shold still ingenerati:
He did, he did, with such an awfull hand,
That never since no creature could withstand.

Then sith he hath such power to Starres infus'd
Is't gainst his glory they same dilace?
If in their Orbs such vertue be incluf'd,
Is't fault in vs their forces to relate?
No, God is great and will be prais'd of all,
He's holy too in workes both great and small,

Should we affirme the Planets wonred force
Or inbred power t'infuse or work at all,
Yet by reflection from that heavenly soures
None dare deny their might Imperiall,
Iaphus hath endow'd bright *Phabus* with such power
That his effects are seene and felt each hower:
Blush then for shame *Ge: Douay* with the ross
To foole ones selfe in Print it is no iest.

Soli & Uni triuo Das gloria.

FINIS.
